

## **Synopsis of the IIM Process**

### **Step 1 Topic**

The teacher works with students to develop concept map on a topic from the class unit.

### **Step 2 Goal Setting**

The teacher leads students in developing good questions to frame the class research study.

### **Step 3 Research**

After the teacher models taking notefacts from two types of resources, students work in teams to take their own notefacts from other resources.

### **Step 4 Organizing**

Student teams organize all notefacts from sources #1, #2 and #3.

### **Step 5 Goal Evaluation**

The class evaluates knowledge acquisition and research process skills.

### **Step 6 Product**

Each student team makes a product to the class.

### **Step 7 Presentation**

The teams present products.
